

**NOTIFICATION OF PESTICIDE APPLICATION  
ON OR WITHIN SCHOOL BUILDINGS**

If the school district receives notice from any commercial applicator licensed under W.S. §35-7-359 or any other person providing notification that such person will apply a pesticide (as defined in W.S. §35-7-354(d)) on or within any building or other real property used by the school district primarily for the education of students, including any property used by the district for student activities or playgrounds, the school district shall provide notice to students, teachers, and staff of the anticipated pesticide application as described below.

The Facilities Department shall distribute a copy of the notice to the building designee within the District who shall post the notice as explained below.

The Facilities Department shall ensure that the notices distributed shall be marked with a distribution date, including a distribution date when the notices were distributed for posting, and that the notices also include information indicating the date of application, location of application or treatment area, the pest to be controlled, name and type of pesticide to be applied, and contact for additional information. The Facilities Department shall retain the notices distributed for two (2) years following the application of the pesticide.

The Facilities Department shall, prior to application of the pesticide, contact the applicator and coordinate with the applicator to ensure that signs are posted on the school building or property stating the date of the application, the location of the application or the treatment area, the name and type of pesticide to be applied, and the contact for additional information. The Facilities Department, upon request, shall provide information on how to obtain additional information on the pesticide.

Signs shall be posted at main entrances to school buildings and at entrances to the specific application areas within the buildings not less than twelve hours before the application of pesticides. If pesticide application is made outdoors to any area adjacent to a school building or on property used by

the district for student activities or playgrounds, signs shall be posted immediately adjacent to the treated area and at the entrance to the district property. The signs shall remain posted for seventy-two (72) hours.

Disinfectants and sanitizers used by school employees for cleaning purposes and which are not defined as pesticides under W.S. 35-7-354 are not subject to the notification and posting requirements described above.
