

**NOTIFICATION OF PESTICIDE APPLICATION  
ON OR WITHIN SCHOOL BUILDINGS**

If the school district receives notice from any commercial applicator licensed under W.S. §35-7-359 or any other person providing notification that such person will apply a pesticide (as defined in W.S. §35-7-354(d)) on or within any building or other real real property used by the school district primarily for the education of students, including any property used by the district for student activities or playgrounds, the school district shall provide notice to students, teachers, and staff of the anticipated pesticide application as described below.

The Facilities Department shall distribute a copy of the notice provided by the applicator to each principal or his/her designee within the district that shall be posted as explained below.

The Superintendent shall ensure that the notices distributed shall be marked with a distribution date, including a distribution date when the notices were distributed to the principals and students, teachers, and staff, and that the notices also include information indicating the date of application, location of application or treatment area, the pest to be controlled, name and type of pesticide to be applied, and a contact for additional information. The school district shall retain the notices distributed for two (2) years following the application of the pesticide.

The school district shall, prior to application of the pesticide, contact the applicator and coordinate with the applicator to ensure that signs are posted on the school building or property stating the date of the application, the location of the application or the treatment area, the name and type of pesticide to be applied, and the contact for additional information. The school district, upon request, shall provide information on how to obtain additional information on the pesticide.

Signs shall be posted at main entrances to school buildings and at entrances to the specific application areas within the buildings not less than twelve hours before application of pesticides. If pesticide application is made outdoors to any area adjacent to a school building or on property used by the district for student activities or playgrounds, signs shall

ON OR WITHIN SCHOOL BUILDINGS**

be posted immediately adjacent to the treated area and at the entrance to the district property. The signs shall remain posted for seventy-two (72) hours.

Disinfectants and sanitizers used by school employees for cleaning purposes and which are not defined as pesticides under W.S. 35-7-354 are not subject to the notification and posting requirements described above.
