STUDENT DATA SECURITY

The Wyoming Department of Education has released School District Data Security Guidelines to establish school district guidelines for the collection, access, privacy, security and use of student data. The District desires to generally implement and follow the guidelines as established by the Wyoming Department of Education and does hereby direct the School District Technology Director to ensure that the District's collection, access, privacy, security and use of student data is consistent with the guidelines and recommendations set forth in the School District Data Security Guidelines referenced in Wyoming Department of Education Memorandum No. 2017-105 released September 25, 2017 to the extent said guidelines and recommendations are applicable to the technology utilized by the District.
