

FIELD TRIPS

Field trips include any time teachers take their class off the school property. Field trips are encouraged when a reasonable educational objective can be established. Field trips must be approved in advance by the Superintendent, his/her designee, or the building principal. All school sponsored trips to foreign countries are to be approved at least six (6) months in advance by the Board. The Superintendent shall provide the Board with a recommendation concerning any foreign trip. The recommendation shall take into account any foreign travel warnings or cautions of the U.S. State Department. In addition, before making any recommendation, the Superintendent may seek advice concerning foreign travel from the District's legal counsel and insurance carrier. Field trips shall follow procedures as defined in Field Trips Procedures (IJOA-P).
