

GRADING SYSTEMS

The administration and teaching staff will devise grading systems for evaluating and reporting student learning. The records and reports of individual students will be kept in a form that will be meaningful and timely to students and parents, as well as teachers.

All grades shall be accurate reflections of a student's academic learning relative to state standards. Issues pertaining to student behavior shall be handled according to school handbooks and shall not be calculated into student grades.

The grading and reporting system shall be developed by the administration and teaching staff at the elementary and secondary levels, submitted to the Superintendent for approval. Substantial or significant changes to the grading and reporting systems shall be submitted to the Board for review and approval.
