

ASSIGNMENT OF STUDENTS TO CLASSES AND GRADE LEVELS

School District administration, in consultation with appropriate personnel, will determine grade and course placement for all students. Students transferring into the school district shall provide the school district with all prior educational records. Students transferring into the school district may be required to take placement assessments to assist in grade assignment and proper placement in core subjects and other classes. Placement decisions made during registration or at the time of transfer are subject to change pending arrival and review of all educational records and the result of placement assessments. Placements at the secondary level will take into consideration the Wyoming High School graduation requirements.
