

STUDENT FUND-RAISING ACTIVITIES

The Board prefers that the school district fund student activities, but it may be necessary for students to raise funds to support some of them. If considered necessary, the fundraising must be approved by the Principal and Superintendent.

School fundraising activities must be approved by the Principal/Activities Director and the Superintendent before the activity is initiated.

The sale of supplies in the classroom as a fundraising project for student activities is prohibited. This does not preclude the operation of a school store under the control and supervision of the Principal or the nonprofit sale of industrial art (art, crafts, etc.) supplies which are used by pupils in making articles that become the individual's property.

All monies collected using the name of Sheridan County School District No. 2 shall be deposited into a district activity fund. All expenses for fundraising activities will be accounted for through a district activity fund.
